from newspaper accounts of similar training in the USSR, the whole program was Soviet inspired. Source stated that the USSR would be extremely unlikely to conduct secret BW research in Bulgaria due to a distrust of the Bulgarian people. The Bulgarians are distrusted by the Soviets to the extent that any foreigners are distrusted by the Soviets. It would be illogical, in source's view, for the security—minded Soviet government to place so sensitive an installation as a BW research center in Bulgaria or any other satellite, where it would be far more accessible, relatively, to agents of foreign intelligence services, than if it were located inside the USSR.
